Notification Description (Including Extent, Purpose / Reason, and Effect on Form, Fit and Function)

As part of our ongoing continuous improvement program, as well as considering the current state of the plastics industry supply chain disruptions, US Digital has decided to focus on the standardization of our plastic encoder components. Based on this, the E2 and the H1 encoder covers and bases will be changing from PBT 20% GF (polybutylene terephthalate) to PC 20% GF (polycarbonate). This change has no impact on the form, fit and function of these encoders.

If you have any questions or concerns about this PCN, please contact our Technical Support Team at 360-397-9999 or email support@usdigital.com.

Alternate Parts (as applicable)

N/A

Effective Date (Including Last Time Buy Date and Conditions, as applicable)

To be implemented for all shipments on or after October 3, 2022 or when the existing material supply is depleted.
