## H1 Product Description

The H1 series ball-bearing optical shaft encoder has a glass-filled polymer enclosure. This non-contacting rotary to digital converter is designed to provide digital feedback information. The H1 is fully assembled with a brass shaft, two 1/4 in. ID by 1/2 in. OD ball bearings, and a mounting plate. The mounting plate comes with 2 mounting holes for #4 size screws.

The H1 is designed to drive cables up to 10 feet long. For longer cable lengths, adding a PC4

(<https://www.usdigital.com/products/accessories/interfaces/cable-drivers/pc4/>) / PC5 (<https://www.usdigital.com/products/interfaces/encoder/cable-drivers/pc5/>) differential line driver is recommended. A connection to the H1 series encoder is made through a 5-pin standard connector. The mating connectors are available from US Digital with several cable options and lengths.

H1 Mold Update - PCN 5259	4/21/2015	As part of our ongoing continuous improvement efforts, and in order to enhance both function and appearance of the H1 product line, multiple improvements are being incorporated into a plastic component redesign.	Download ( <a href="https://www.usdigital.com/support/resources/product-change-notifications/pcn-5259-h1-mold-update/">https://www.usdigital.com/support/resources/product-change-notifications/pcn-5259-h1-mold-update/</a> )
EM1 & EM2 Update - PCN 4199	1/14/2014	Based on our continuous process improvement program, US Digital is changing the current marking method for our EM1 and EM2 encoder modules to a serialization method. This change will allow for each module to have a unique code; the current marking method is based on a date code system that includes all encoder modules produced within a specific week / year. The serialization system will be based on a hexadecimal system. EOL Sealed Housing Option - PCN 1021	4/11/2013	<p>This PCN is a formal notification that US Digital is discontinuing the Sealed Housing option for the following products:</p> <ul style="list-style-type: none"> <li>• A2 Absolute Optical Encoder</li> <li>• A2T Absolute Optical Inclinator</li> <li>• H1 Ball Bearing Optical Shaft Encoder</li> <li>• H3 Ball Bearing Optical Shaft Encoder</li> <li>• S1 Optical Shaft Encoder</li> <li>• S2 Optical Kit Encoder</li> </ul> <p>The Sealed Housing option provides the encoder with low level capability of surviving in moisture environments, however the encoder is NOT water proof or intended to be used in applications where this is required.</p>	Download ( <a href="https://www.usdigital.com/support/resources/product-change-notifications/pcn-1021-eol-sealed-housing-option/">https://www.usdigital.com/support/resources/product-change-notifications/pcn-1021-eol-sealed-housing-option/</a> )
EM1 LED Die - PCN 1016	2/7/2013	<p>As part of US Digital's continual assurance of supply strategy, we have qualified additional sources for our LED die used in our EM1 encoder module, which in turn impacts all of the following products:</p> <p>EM1, E2, E3, E5, E6, H1, H15, H3, H5, H6, HB5M, HB6M, HD25, PE, S1, S2, S5, S6, T5 and T6</p> <p>The device specification will remain the same, i.e. there will be no change to form, fit or function of the product(s) as specified by US Digital. The appropriate quality and reliability testing has been performed on representative products to ensure normal parametric distribution, consistent with US Digital's quality and reliability standards.</p>	Download ( <a href="https://www.usdigital.com/support/resources/product-change-notifications/pcn-1016-em1-led-die/">https://www.usdigital.com/support/resources/product-change-notifications/pcn-1016-em1-led-die/</a> )
