

CA-C10-SH-NC Product Description

The CA-C10-SH-NC cable has a 10-pin female standard (non-latching) connector on one end of an 8-conductor round shielded twisted pair 24 AWG cable; the other end is unterminated. The unterminated end may be wired to a customer-supplied connector or terminal strip. The standard length is 1 ft., and available in 1 ft. increments up to 500 ft.

Please note: This cable is normally used with our PC4 differential cable driver (<https://www.usdigital.com/products/accessories/interfaces/cable-drivers/pc4/>) since the PC4 (<https://www.usdigital.com/products/accessories/interfaces/cable-drivers/pc4/>) does not support the latching connector feature built into encoders like our E5 (<https://www.usdigital.com/products/encoders/incremental/kit/e5/>) and E6 (<https://www.usdigital.com/products/encoders/incremental/kit/e6/>).

WARNING: This product can cause exposure to substances, such as *phthalate plasticizers*, known to the State of California to cause cancer and reproductive harm. For more information, go to oehha.ca.gov/proposition-65 (<https://oehha.ca.gov/proposition-65>).
